RE: Docket Number E-01933A-12-0291

Dear Honorable Members of the Corporation Commission,

As a business owner and Tucsonan, I'm very concerned about the cost of energy use, which is why I advocate for the adoption of the energy efficiency plan for TEP during the TEP rate case and other relevant proceedings.

I am a customer of Tucson Electric Power. Businesses and other customers benefit from programs that make their homes or businesses more efficient by fixing leaks, changing air filters, or sealing windows. Decreased need for energy will drive down the costs spent on purchasing fossil fuels, and relying less on imported fuels increases the energy security of our community.

The time is right for Tucson to embrace an efficient, secure energy future, and it starts by advancing the TEP energy efficiency plan.

Thank you for your service to this state and your consideration on this matter.

Yours Sincerely,

Trudy Mills
